# Build anything with

QUBELOK

The Qubelok system lets you design and create your own storage, display furniture and items for domestic or office use. Qubelok's strength and light weight gives you unlimited design options. Available in a range of colours and with a variety of accessories, the only limit is your imagination!
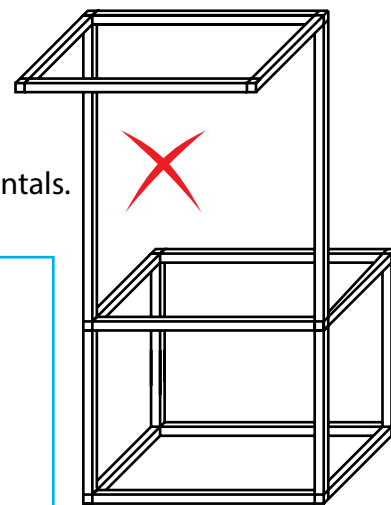

Shapes

Versatile, solid geometric combinations.
Solid geometric shapes like those ticked below are the strongest.
Connecting cube shapes make the strongest units.

Cube shapes are very strong.

There should be no unsupported horizontals. (cantilevers)

Legs up to 300mm long may be used on most structures. Up to 400mm long on light duty tables and stands.

Longer legs need a stiffening cross member.

Usually all joints should be supported by downward struts

7.5mm Receptor

QUB -REC7.5

Qubelok has lipped tubing (QUB1L) available which allows you to inset timber or glass shelving to suit your needs. Flip the tubing over to create a low or high set lip for a flush finish.

TIMBER Shelves or table tops of 17mm timber or particle board fit neatly on the low set lip support.

GLASS When fitting glass or perspex, turn the lipped tubing over to set the lip high for a 6mm thickness.

17mm

6mm

Accessories and Connectors

Castors - Fit precisely and securely into the tubing to make items easy to move around.

End Cap - Finish off legs and prevent scuffing on your tile, carpet or timber flooring.

Qubelok Extrusions are available in mill finish, clear or black anodised, or custom order any colour.

Choose from seven different **Qubelok connectors** to create any number of combinations
